

ENGINEERING SPECIALISTS INC.

Providing Technical Engineering Services Worldwide Since 1974

KNOWLEDGE & EXPERIENCE YOU CAN TRUST

**IS IT TIME TO UPDATE YOUR PLC5'S?
ENGINEERING SPECIALISTS, INC IS OFFERING PLC5 UPGRADES**

We can take responsibility for a total project from initial concept, through hardware and software design, to installation and documentation.

Where project requirements are less inclusive, we will provide assistance for only those portions of a project that is required. With our well-rounded staff, we have the ability to provide complete "turn-key" systems or any part thereof.

Our controls engineering staff is well trained and experienced in advanced programming techniques for wide variety of programmable controller systems and computers.

Software is written in a well-structured and easy-to-follow format, allowing the end user more flexibility in analyzing, maintaining or modifying the control of the machines, systems or processes.

We regularly provide graphical operator interfaces, supervisory control, data acquisition, and production and process control. Alternatively we can interface to new or existing systems that provide this functionality.

Our History

**A REGISTERED PROFESSIONAL
ENGINEERING FIRM**

UL508 Certified (NNNY, NRBX, NITW)

Engineering Specialists, Inc. was founded by Robert Miller, a graduate of Marquette University's Electrical Engineering Program and Robert Phillips, a graduate of MATC.

The two close friends in need of a change had thought about consulting, but instead began building and designing the sophisticated equipment used by many of the most competitive businesses in the market today. Bob Miller recalls filing the very first customer file in his cabinet wondering if he would ever fill it. That was over 40 years, 1400 customers, and 20,000 projects ago!

With the technological challenges that all businesses experience, sometimes on a daily basis, Engineering Specialists has managed to evolve with the times to keep its customers in motion and ahead of their competition.

Contact Engineering Specialists today and find out how our skilled engineers and technicians can provide your unique business with the tools it needs moving forward successfully into the future.
