

**A REGISTERED PROFESSIONAL
ENGINEERING FIRM**

UL508 Certified (NNNY, NRBX, NITW)

WATER & WASTEWATER EXPERIENCE

**KNOWLEDGE
AND EXPERIENCE
YOU CAN TRUST**

Engineering Specialists is a CSIA-certified automation integrator that has been successfully providing a wide range of services from complete turnkey automation design/build to simple control panel assembly and all things in between since 1974. Engineering Specialists functions as an extension of your staff to make sure that you have the right resources to maximize your efficiency, product quality, and profitability.

INTEGRATING TURNKEY INDUSTRIAL AUTOMATION AND DIGITAL INFORMATION SOLUTIONS

OUR TEAM HAS **EXTENSIVE EXPERIENCE** IN THE WATER & WASTEWATER INDUSTRIES.

As a Wisconsin-based company, we're extremely committed to the Water and Wastewater Industries that are critical to maintaining high quality drinking water which in turns creates a strong state economy. Our team possesses the experience and knowledge of equipment specific to the water and wastewater industry. We understand the automation challenges the industry faces today. But more importantly, our engineers are skilled at developing solutions to increase throughput, simplification of compliance reporting and potentially reduce energy costs. We develop comprehensive solutions from sourcing equipment to process control, and everything in between.

Whether you want to modify your systems now or over the course of years, it is up to you. We provide a total installation program that is based upon your timeline, not ours.

Representative projects we have worked on include:

- Complete Wastewater Plant Automation
- UF Membrane Filtration Systems
- CIP Systems
- Compliance Reporting
- Advanced Alarming

The control systems integrated on these projects utilized various major control system platforms, including PLCs, PCs, Drives, and HMI's. Engineering Specialists also utilized custom applications and PC-based SCADA systems for supervision and data acquisition. In most cases, Engineering Specialists was responsible for the design, assembly, certification (if needed), programming, installation, and start-up of these control systems.

We understand the unique challenges that Water and Wastewater Industries presents and completed many successful installations. Engineering Specialists can assist you in whatever capacity is needed. We will help make your project a success whether it is full project management or a simple consultation. Please contact us to learn more about our industry experience.
